

Periodontal Kit Dr. Daniele Cardaropoli

Periodontal Kit developed with Dr. Daniele Cardaropoli.

The special octagonal handle gives to each instrument a remarkable cutting ability and precision. The complete kit provides a set of sharp surgical instruments which are essential during the periodontal conservative and resective –regenerative surgery.

This kit can be used both for remodelling bone tissue and decontaminating periodontal pockets and for polishing root surfaces.

The millimetre probe, up to 15 mm, is essential for proper diagnosis and planning during the whole treatment.

Daniele Cardaropoli, DDS

Kit Description - OM30K0005

SKU#	Description
OM70B8015	DC1 millimetric probe 15 mm
OM70B8013	DC2 tissue dissector 13.5 cm
OM70B8151	DC3 Kramer-Nevins scalpel
OM70B7286	DC4 Papilla Elevator
OM70B7743	DC5 Micro Periosteal Elevator
OM70B8002	DC6 straight fedi chisel
OM70B8107	DC7 rhodes back-action 36/37
OM70B8274	DC8 goldman-fox gf-4
OM70B0052	DC9 Molt curette 2/4 modified
OM70B3119	DC10 Scaler M23

OM70B8015
