# Contemporary Oral Surgery for the General Dentist: A Simple and Predictable Approach to Minimally Invasive Oral Surgery

Dr. Alan Jeroff

One of the frequently occurring, frustrating challenges when extracting teeth is breaking the tooth off at the bone level or apices. Non-predictable outcomes start by removal of facial bone creating an unsightly depression. This course will walk you step by step through proven and effective ways to remove teeth while causing minimal trauma to the underlying bone and reducing the risks of complications.

Implant placement is dependent upon bone quantity and quality. The ideal opportunity for bone preservation exists at the time of tooth extraction. All too often this opportunity is lost. Extraction techniques will be demonstrated that not only preserve but augment the amount of alveolar bone. The importance of atraumatic surgical techniques, the use of bone grafts, resorbable membranes will be elucidated. As implant dentistry evolves to become the standard of care, education on the maintenance of bone and soft tissue after tooth extraction is essential. Socket grafting following tooth removal is proven to reduce bone loss, maintain ridge proportion, enhance esthetic and post-operative outcomes and satisfy patient expectations.

This course is designed for the novice and advanced clinician. All concepts and techniques can be applied the next day in your office.

### LEARNING OBJECTIVES/UPON COMPLETION YOU WILL BE ABLE TO:

- Know the minimally invasive tooth removal techniques and instrumentation
- Remove broken and difficult teeth with minimal flap
- Apply effective local anesthesia techniques
- Apply tissue management and flap designs for various surgical procedures for optimal end result
- Know the latest updates on managing patients on bisphosphonates
- Understand why socket grafting is important and the relevance of choosing your graft material
- Manage complications more efficiently
- Know different Suturing techniques
- How to best combine anesthetic agents and injection techniques to provide comfortable and predictable surgical procedures

**ALAN JEROFF, DMD** graduated from the University of Manitoba Dental School in 1977 and practises in Vancouver, British Columbia, Canada. He completed a mini-residency in Oral Surgery at the University of the Pacific Arthur A. Dugoni School of Dentistry in San Francisco, California and was a clinical tutor at the University of Otago School of Dentistry in Dunedin, New Zealand. Dr. Jeroff lectures widely on Oral Surgery at national and international levels. He is an examiner to undergraduate dental students and interviews candidates for admission into the DMD program at the University of British Columbia, Faculty of Dentistry. He is presently an assistant clinical professor at the University of British Columbia, Faculty of Dentistry and performs all the Oral Surgery procedures including wisdom teeth removal and implant placements at the Burrard Implant

Centre Dental Clinic. He is an active participant in study clubs, an aviation enthusiast and an IFR commercial pilot with more than 2500 flight hours in different types of aircraft including gliders and T34 training jets. He currently is a medivac/air ambulance pilot for an organization called Angel Flight, which flies patients for cancer treatments at various cancer centers in British Columbia.

**CANCELLATION POLICY:** Fee in full must accompany registration. Registrants withdrawing 72 hours prior to the course will be refunded less a \$50 administration fee. No refund will be granted for cancellations made less than 72 hours prior to the course date. Continuing Dental Education at The University of British Columbia reserves the right to cancel courses or switch instructors if deemed necessary by low enrolment, instructor cancellation or other unforeseen issues. In case of course cancellation a full refund will be issued.

CDE at UBC is an ADA CERP Recognized Provider. ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Concerns or complaints about a CE provider may be directed to the provider or to ADA CERP at [www.ada.org/ceerp](http://www.ada.org/ceerp).

**DISCLAIMER:** Dental education institutions have an obligation to disseminate new knowledge related to dental practice. Some presentations may include controversial materials or commercial references. Sponsorship of a continuing education course by The University of British Columbia does not imply endorsement of a particular philosophy, procedure or product by The University of British Columbia. Fee in full must accompany registration. The tuition fee is deductible for Canadian Income Tax purposes. See cancellation policy.
