

ANNUAL SUBSCRIPTION

Good news! Your account is eligible to participate in the Annual Subscription Program beginning next month.

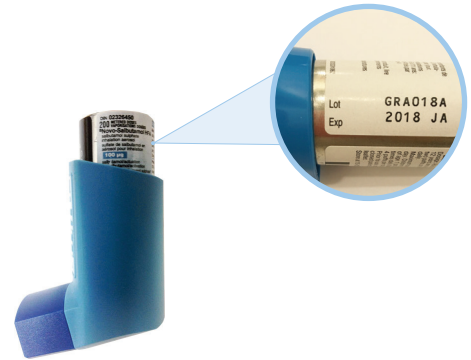

Deadline to submit your form is the 27th of this month.

HANSAméd Limited's new LIGHTHOUSE™ Annual Subscription provides you with quality medication monitoring and expiry tracking without all the hassle of individual invoicing and bill payments. PLUS, you get the added bonus of FREE SHIPPING with your annual subscription! Rest assured that we will keep you current and prepared in the event of an in office medical emergency.

Why do I need a monitored replenishment service?

Because all medications have a limited shelf life, it is important that they are tracked and replaced before they expire in order to ensure that your LIGHTHOUSE™ Medical Emergency Kit is ready for a medical emergency. An up-to-date emergency kit may also help you meet existing guidelines on emergency preparedness.

How does the LIGHTHOUSE™ Annual Subscription work?

Expiration dates on individual medications are tracked.

How often will I receive refill shipments?

The first refill shipment will occur just before the first expiration of a medication in your LIGHTHOUSE™ Kit. All refill shipments will include the expiring drug, plus any additional medications that expire within 60 days.

How often shall I train my staff?

Annual unlimited access to online training is included in this program (\$129.95 value). Renewed access and completion of the training gives you and your staff confidence you are ready to handle an office emergency.

What if I purchased from an authorized dealer?

Even if you purchased your LIGHTHOUSE™ Kit from an authorized dealer, HANSAmEd Limited will track and replace expiring medications. After the initial purchase, all refills, billing and customer support will come from HANSAmEd Limited.

With the \$195.95* Annual Subscription, you will receive the replenishment medications listed below (replenished at time of expiry) and FREE deliveries.

* plus applicable tax.

- Atropine 0.6mg/ml
- Epinephrine 1mg/ml
- Diphenhydramine 50mg/ml
- Salbutamol Inhaler 100 ug
- Nitroglycerin Pump spray 0.4mg
- Aspirin® 325mg (24/bottle)
- Insta-Glucose 31mg

Note: EpiPen® Adult 0.30mg & EpiPen® Jr 0.15mg can be ordered as an add-on for an additional cost.
